

The Town of Alden, at no cost to the community, has partnered with Sunnking to dispose of any obsolete computer and electronic devices that you may have. Computers and electronics may contain hazardous waste elements such as lead solder, mercury, cadmium and beryllium. Monitors, CRTs and televisions may have from 4 to 8 pounds of lead. These types of equipment need to be recycled properly in an environmentally sound manner. Although consumers are currently exempt from penalty for improper disposal, everyone is encouraged to be environmentally conscious. All hard drives are either sanitized or destroyed during the recycling process; additional data security services are available on a fee basis. The town of Alden's solid waste contractor will not pick these items up during the weekly street-side pickups.

### **Drop Off Location**

Alden Town Hall  
3311 Wende Road  
Alden NY 14004
